Type of packaging _____ Dimensions in cm (L x W x H) _____ Weight in kg _____ Qty. _____

to be filled in only if the packaging type
does not clearly specify the dimension:

Packaging instructions

The machines are only sufficiently insured if they are correctly packed. Cable drums or complete systems, universal controls and carriages packed in wooden crates as well as milling drives packed in sturdy cardboard tubes or PE tubes are insured not only against loss but also damage. In some cases, carriages and controllers can also be shipped in a sturdy cardboard box and with sufficient cushioning material without losing insurance coverage. Equipment shipped on pallets, on the other hand, is only insured against loss. Palletized goods must also not only be adequately lashed, but if possible also wrapped to prevent possible damage from other goods in transit. Furthermore, pallets with machinery are not stackable and cause additional costs for most transport companies.

All means of transport must have only the shipping labels intended for this shipment. All old labels must be removed beforehand.

Corresponding labels will be sent to you by e-mail or by the transport company.

If you have any questions, please contact our transport department: +49 (0) 35205 / 7555 – 32 or – 37.

Please send the orders to _____

and _____

ATTENTION!!! The machines are insured at the time of shipment according to their current value!!!

Please do not return nitrogen cylinders!

We hereby declare that we have taken note of all the above information and confirm the order for collection:

Name, Signature, Stamp

digital transmission is possible even without signature and stamp
